

Sun and Heat Guidance

What the school will do:

- Provide fans for all classrooms
- Follow procedures for opening windows and doors as appropriate for outside temperatures
- Split lunchtime periods, giving children time in the hall, on the field and in the air-conditioned classrooms
- Erect gazebos on the field for additional shade
- Encourage children to stay in the shade when outside
- Remind children to wear hats and sunglasses, where provided from home
- Supervisor of children applying sun cream, 15 minutes before level 3+ sun exposure
- Adapt lunchtime sport activities
- Make children's water bottles available throughout the day
- Give time in classes for children to take water breaks
- Allow children to have calm and quiet time to cool down if needed after playtime
- Talk to children regularly about sun safety
- Inform parents if any additional measures are required, e.g., change in uniform or finish time. Please note, this will only happen in extreme weather situations
- Provide staff training on Sun and Heat Protection
- Implement any other recommendations and guidance provided by Government and Surrey County Council

What we ask parents to do:

- Provide your child with a named water bottle
- Dress your child with a named sun hat; they may also wear sunglasses if required
- Dress your child in PE clothing
- Ensure your child is wearing sunscreen. We recommend a long lasting factor 30+ to provide a good base coat of protection
- Supply child's own sun cream in original bottle, clearly labelled and sent in book bags or swimming bags for Year 2
- Inform school of any sun allergies and send any prescription sun cream (where given by GP) to the school office
- Remind your child about sun safety and staying in the shade when possible

What we ask children to do:

- Wear sun hats with a cap/wide brim and glasses, as provided by parents
- Apply their own sun cream to themselves only, as provided by parents
- Stay in the shade when they can
- Play calm games
- Drink plenty of water
